

HOW TO IDENTIFY OUR LEAD FREE PRODUCTS:

Everflow has developed a comprehensive set of identifiers and markings to enable you to quickly and easily identify our Lead Free products and part numbers. This will make compliance easier and help eliminate mistakes.

Identifying Products:

Look for our Lead Free logo on labels, boxes and tags, and/or NL marking on the body of many of our Lead Free products.

Identifying Part #'s:

The suffix NL will be added as part of our part numbers on all Lead Free items that have similar standard versions available. NOTE: If a product is only available in a Lead Free version, NL will not be added.

Example:

STANDARD PRODUCT #
410C012

LEAD FREE PRODUCT #
410C012-NL

All Everflow Lead Free products will contain one or more of these identifiers. This will help enable you a smooth transition to becoming Lead Free.
